

Milk products

Creamy quark with yoghurt

Uelzena

Ingredients

Quark preparation (100 % cow's milk) made from skimmed milk quark, skimmed milk yoghurt and low-fat yoghurt. The product has a fine, slightly sour taste and a smooth texture. The fat content of the standard product is below 1.0 %. Composition and fat content of this product can be customized to customer's specifications. Prolonged shelf life due to gentle heat treatment.

Use

- » Basis for desserts
- » Ice cream
- » Delicatessen
- » Baked goods
- » Ideal for desserts layered with fruits and/or muesli in the deli counter

Product benefits

- » Fat-reduced alternative to acidified cream products
- » Full-bodied taste with pleasant mouthfeel
- » Creamy consistency despite low fat level – ideal for desserts

Excellent processing properties in industrial processing
